

Water & Sewer Committee Minutes  
June 23, 2021

The Water & Sewer Committee met on Wednesday, June 23, 2021 at 3:30pm. Present were Mike Delaney, Bill Hosch, Mayor Greg Staner, Pat Kearney and the City Administrator, Deanna McCusker.

The main purpose of this meeting was to discuss the idea of watering a yard when a new home is built and only paying sewer on normal water usage and getting a discount on the remaining gallons used. It would be only for a 30-day window. The normal usage would be based on the concept of 2,000 gallons per person in the home. Pat is willing to test this concept and see how it works and then come back to Council to discuss. It would be like a thank you for building in Cascade. This will get reviewed later this fall following the watering of his yard.

With nothing further, the meeting adjourned at 4:00pm.

Deanna McCusker, City Administrator

Greg Staner, Mayor
